THURSDAY 7TH MAY — 📍 BEL MARINA RESORT, PREMIER BALLROOM

1300-1600	Workshop	Rob Timmings	ECG Rhythm Interpretation

REGISTER NOW

Vietnam Register button > Scroll down to Add On's

This 3-hour hands-on workshop explores rhythm interpretation and telemetry monitoring using a range of complementary teaching methods, with a strong focus on application in the acute care environment. Well suited to clinicians working in emergency settings

Topics Covered:
- Micro and gross anatomy of the cardiac system, including cardiac output, ejection fraction, cardiac reserve, and inotropy
- In-depth analysis of ECG waveforms
- Aberrant waves and segments (PR, QRS, and ST segment analysis)
- AV heart blocks
- Atrial, junctional, and sinus rhythms
- Wide complex rhythms

Participants will work through 16 different Lead II strips, with handouts provided.
